

FEEDING OUR FUTURE

Hello, we are **NutriFresh** and we have set out to change the way children are eating!

NutriFresh began as an initiative set out to make a difference, in the quality of meals provided at nursery settings. There was a need for a company to make the step in providing fresh, nutritious and delicious meals. Recognising a change was needed, the idea to become the number 1 catering company specialising in early years nutrition started.

We believe children should have the opportunity to eat healthier as food plays a key role in their development. Making sure they get the right minerals and vitamins in their meals will help them grow and develop optimally, whilst energising and supporting their ability to learn.

NutriFresh supply fresh nutritious meals daily for early years settings, which not only fills up tummies and put smiles on childrens' faces but also fuels their brains. We work closely with nutritionists and our professional chefs to ensure our meals and menus are developed to specifically meet the requirements and taste of children by using local fresh wholesome ingredients (yummy!).

We take pride in our approach and are committed in providing an exceptional service, to our customers, parents and children, to build a long-lasting relationship and make a real difference.

Freshly from,
NutriFresh
